Forecast for Friday 15 Sep 2023

Weather: Cloudy with some heavy and persistent spells during the morning. Rain perhaps clearing north during the afternoon but low confidence in this clearance. Rain turning lighter and patchier during the evening.

Chance of cloud-free hill tops above 700m: 20%, perhaps increasing to 50% if the rain band clears north during the afternoon.

Low cloud and visibility: Broken or overcast low cloud over most summits in the morning with cloud bases above 300m with poor visibility accompanying the rainfall and drizzly conditions. If the rain band clears north cloud around southern hills will lift and break up during the afternoon with visibility becoming moderate.

Meteorologist's View

Feeling cool in persistent rain on Friday morning with fresh to strong northerly winds expected.

Forecast for Saturday 16 Sep 2023

Weather: Cloudy with some light rain and drizzle at first on Saturday but improving from the north during the day with some sunny spells for most by late afternoon. Feeling cool in fresh or strong northeasterly breezes.

Maximum wind: Northeast 20mph with gusts 30mph.

Chance of cloud-free hill tops above 700m: 40% improving to 80%, cloud lifting and thinning during the day.

Low cloud and visibility: Scattered or broken low cloud around hills in the morning, most low cloud will soon lift and clear with good views likely.

Temperature: **Valleys:** Plus 6 rising to 15 Celsius.
At 700m: Plus 5 rising to 9 Celsius.
Freezing level: Above all summits.
